Corrections

Correction for Deliverable D2.2. The authors note that Equations (3) and (5) were incorrect, as was the name used for the triangular distributions. The distribution describes as a triangular distribution should be named isosceles triangular distribution whereas the left-sided triangular distribution should be named triangular distribution. The corrected formulas appear below. The document was corrected.

$$s = \frac{b-a}{\sqrt{12}} \tag{3}$$

$$s = \frac{b-a}{\sqrt{24}} \tag{5}$$
